

LOVE VET transfer meeting in Zagreb/Croatia

First transfer activity in the LOVE VET project was carried out in Zagreb/Croatia on February 6th to 7th 2016. Invited and organized by the Croatian chamber of craft (Hrvatska Obrtnicka Komora) Wilfried Dülfer and Dieter Holstein from Oskar-von-Miller-Schule Kassel presented the idea and the content of the LOVE VET project.

Wilfried Dülfer focused on the “new teaching and learning cultur”; Dieter Holstein explained the structur of the project, the competence grids and the eLOVE App.

The discussion with the participants of the meeting (chamber of craft, headmasters of vocational schools and of the craft school of the chamber) pointed out that the outcomes of LOVE VET project could be very helpful in the Croatian vocational training system. The system of a “new teaching and learning cultur” shows a new horizont for the partners in the VET.

The participants of the meeting will discuss how to start working in the LOVE VET project as an transfer partner. National leading organisation in this transfer should be the Croatian Chamber of Craft.
